

# Construction Machinery Matching

Work together as a family to see if you can match the machine with its function.

Backhoe Loader

...levels the ground before a road is paved.

Bulldozer

... lifts heavy materials to the tops of tall buildings.

Compactor

...used to lift and transport materials especially in warehouses.

Concrete mixer

...has a single telescopic boom that can extend forwards and upwards from the vehicle and can have various attachments fit onto the end.

Crane

... a crawler that pushes soil or rubble etc.

Dump Truck

... rolls and mixes concrete.

Excavator

... used to demolish buildings.

Forklift

...has many uses but is primarily used for digging.

Grader

.... hardens the ground as it presses soil, stones and asphalt.

Telescopic Handler

... used for transporting loose material.

Wrecking Ball

.... digs from the back and shovels from the front.
